DUST COLLECTOR TIMER CONTROLLER
Modular Design, User Friendly, Up to 22 Channels

The Series DCT1000 Dust Collector Timer Controller simplifies on-demand cleaning requirements by eliminating the need for external devices such as pressure switches, relays, and timers. The modular design allows for use as a continuous cleaning control or on-demand cleaning control using the optional plug-in pressure module. The DCT1000 is the same size for 6, 10, and 22 channels, allowing one board size to be the standard on one enclosure.

FEATURES/BENEFITS
• Universal power requirements for both domestic and overseas use
• Standard mounting holes to other dust collector controllers for use in existing installations
• Able to automatically detect any channel expander connected

APPLICATIONS
• Dust collection
• Pneumatic conveying
