**SINGLE AND DUAL PRESSURE SWITCH**

High Reliability, Repetitive Accuracy within ±1%

On the Series 1620 Single and Dual Pressure Switch our old faithful switch design is still best where highest precision combined with diaphragm sealed leak proof construction and mounting simplicity are required. Model 1626 and 1627 differential pressure switches are identical in design and construction except that Model 1626 can therefore provide dual control when required. It can be set to open or close two independent electrical circuits, each preset for its own actuation pressure. Both units have a diaphragm mounted to provide leak-proof construction for maximum protection against leakage.

**FEATURES/BENEFITS**
- Single or dual action switches support consistent designs with similar models, but with the ability to match specific application needs
- Sealed diaphragm provides leak-proof construction for high accuracy and precision control

**APPLICATIONS**
- Damper positioning
- Duct air control

**SERIES 1630**

**LARGE DIAPHRAGM PRESSURE SWITCH**

Visual Set Point Adjustment in 5 Standard Ranges, 0.05 in to 12 in w.c. Repetitive Accuracy within ±1%

On the Series 1630 Large Diaphragm Pressure Switch, our highest precision conventional large diaphragm pressure switch provides maximum dependability. In addition, it incorporates a visible set point indicator for maximum convenience. UL and CSA listed, FM approved for general service. Electrical capability of 15 amps handles most small electrical loads. For use only with air or compatible gases.

**FEATURES/BENEFITS**
- Visible set point indicator simplifies operation and trouble shooting
- Large diaphragm provides low range accuracy providing precise control
- Current loads of up to 15 amps supports most small electrical loads by using a 100% smart HVAC and Process applications without the need for additional relays and components

**APPLICATIONS**
- Damper positioning
- Air conditioning
- Duct air control
- Industrial service
