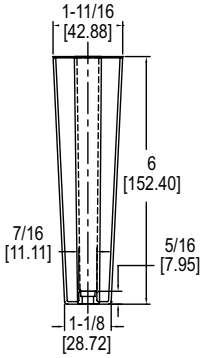
AIR METER/DRAFT GAGE

A Low-Cost, Direct Reading Instrument Used for Air Velocity & Static Pressure Tests

Furnace draft

Grille velocities



The **MODEL 460** Air Meter is popular for servicing HVAC equipment because of its consistent, accurate results. The direct reading velocity and static pressure scales show supply and return grille velocities, furnace draft, and pressure drop across filters. The 460 is made of a rugged plastic for daily use.

FEATURES/BENEFITS

- High and low range velocity in one unit
- Simple and quick operation with highly accurate results
- Compact housing for easy portability

APPLICATIONS

- Measuring grille velocities, furnace draft, and pressure drop across filters

MODEL CHART		
Model	**Description**	**Price**
460	Air meter, complete kit	**$42.75**

A Complete Pocket-Size Kit
Includes air meter, return and supply grille probes, angle connector, cleaning materials, instruction card, air velocity calculator and carrying case.

ACCESSORIES		
Model	**Description**	**Price**
A-378	Tube of 3 replacement floats	**$11.75**
A-379	Supply grille probe	**8.00**
A-380	Return grille probe	**9.20**
A-381	Cleaning kit including 1 anti-static chemically treated pipe stem cleaner and nylon high range orifice cleaner	**5.00**
