**PERFORATED OR SPIRAL COOLING TOWERS**  
Protect Instrumentation in High Temperature Applications

The Series A-240/A-250 Perforated or Spiral Cooling Towers protect pressure instruments during high temperature applications. Both the spiral and perforated styles are made with 316L SS, and are available with various process connections in NPT or BSPP style. Both Cooling Towers are ideal for use with pressure gages, switches, and transmitters where the process media temperature exceeds the rating of the instrument.

### ADJUSTABLE PRESSURE SNUBBER

Protect Instruments from Pressure Spikes or Fluid Hammer

The Adjustable Pressure Snubbers protect pressure instruments against fluctuations, surges, spikes and fluid hammer. The fine thread adjustable valve allows you to fine tune harmful harmonic vibration from the fluid systems and isolate the instrument from process when service or replacement is necessary. These Pressure Snubbers are designed to provide fully field adjustable dampening. By using our Adjustable Pressure Snubbers, you will alleviate surges and pulsations to assure steady pressure readings and extend the life of your instrument.
