Gas Pressure Test Kit

Convenient Kit Perfect For Testing LP and Natural Gas Controls

The **Model LPTK Gas Pressure Test Kit** is ideal for testing LP and natural gas lines and controls. The kit's gage shows if proper pressure is present or if a leak exists. The LPTK Gas Pressure Test Kit is available in two different gage ranges, and each gage is 3% full-scale accurate with an easy to use calibration screw on the back of the gage. It is easier to use than a manometer, and includes a sturdy case for added durability and safe handling.
