ATEX APPROVED 1823 DIFFERENTIAL PRESSURE SWITCH

The 1823 in Flame-Proof ATEX Enclosure

Essential for industrial environments, the ATEX approved SERIES AT21823 combines small size with 2% repeatability. Set point adjustment inside the switch allows for set point settings across 9 ranges from the low of .07 in w.c. to a maximum 85 in w.c. differential pressure. Series AT21823 flame-proof ATEX enclosures are available in aluminum and are ideal for low pressure hazardous area applications. Various housing options such as an overpressure relief valve or external setpoint adjustment knob are available. External setpoint knob allows adjustment without opening the enclosure.

FEATURES/BENEFITS
- Compact size and repeatability, provides a high-value switch for many industrial applications
- External setpoint knob provides easy access that simplifies making adjustments without opening enclosure
- Flame-proof ATEX enclosure protects the device in hazardous areas

APPLICATIONS
- Hazardous area pressure switch
- Process applications
- Mechanical equipment control

Attention: Check local safety rules and warnings on unit and manual for a correct use of the instrument in hazardous area.
