

FLEXISENSE™ ROOM PRESSURE MONITOR

Room Status Indication, Magnehelic® Gage Size

The **Series RPME FlexiSENSE™ Room Pressure Monitor** is designed for low differential pressure applications that require stringent pressure monitoring and alarming. The Series RPME FlexiSENSE™ room pressure monitor can be configured to monitor positive or negative pressure in protected environments and clean manufacturing areas. The RPME FlexiSENSE™ room pressure monitor is a complete system with a fixed segment LCD which enables access to pressure, security, calibration, and alarm setup. The RPME has a brushed stainless steel bezel that allows for easy cleaning.

The RPME FlexiSENSE™ room pressure monitor has built-in status indication LEDs that will appear green when within the user-defined pressure set range and will appear orange when outside of the pressure set range. 2 SPDT independent control relays with adjustable deadbands are also provided along with a 4-20 mA process output.

FEATURES/BENEFITS

- 2 SPDT relays allow for capability of local alarming and alarming to control system
- Automatic or manual alarm reset
- Visual LED alarms provide immediate local alert allowing corrective action to be taken quicker to eliminate the problem from becoming widespread
- Stores peak and valley process readings
- Same installation diameter as Magnehelic® gage which simplifies field upgrade to RPME FlexiSENSE™ room pressure monitor
- Password protected setup menu ensures no errors by untrained personnel

APPLICATIONS

- Clean manufacturing areas
- Clean rooms
- Research labs
- Vivariums
