The Series BTG Bulk Tanker Gages possess psi scales with 1% full scale ANSI B40.1 Grade 1A accuracy. The BTG gage is perfect for use on tanker trucks for monitoring discharge pressures while tank is being unloaded. The 4.5” BTG gages are designed with an epoxy coated black steel housing that is rust and corrosion resistant. The BTG gages are designed with a silicone dampened counter weight attached to the movement which allows the units to withstand vibration. Wetted parts include a brass socket and phosphor bronze Bourdon tube. Units can withstand temperatures of -40 to 160°F (-40 to 71°C). Units come with a 1/4” male NPT bottom connection.

**SPECIFICATIONS**

**Service:** Compatible gases and liquids.

**Wetted Materials:** Brass socket, phosphor bronze Bourdon tube.

**Housing:** Epoxy coated black steel case with removable back flange.

**Lens:** Plastic.

**Accuracy:** 1% full scale ANSI B40.1 Grade 1A.

**Pressure Limit:** 110% of full scale.

**Temperature Limits:** -40 to 160°F (-40 to 71°C).

**Size:** 4.5” (115 mm).

**Process Connection:** 1/4” male NPT lower.

**Weight:** 17.6 oz (499 kg).
